

Green Mobile Networks & Base Stations

Strategies, Scenarios & Forecasts 2009-2014

Table of Contents

Glossary	9
Executive Summary	
<hr/>	
Introduction	11
What This Report Covers	11
Three Scenarios: Incremental, Progressive, Transformational.....	11
Scenario Comparison	12
Base Station CO2 Emissions.....	12
Figure ES1: CO2 Emissions (Mt) from Base Station Electricity Split by Scenario, 2008-2014	12
Table ES1: CO2 Emissions (Mt) from Base Station Electricity Split by Scenario, 2008-2014.....	13
Figure ES2: Base Station CO2 Emissions (kg) Per Mobile Subscriber Split by Scenario, 2008-2014	13
Table ES2: Base Station CO2 Emissions (kg) Per Mobile Subscriber Split by Scenario, 2008-2014.....	13
Base Station Electricity Costs.....	13
Figure ES3: Base Station Electricity Costs (\$m) Split by Scenario, 2008-2014.....	14
Table ES3: Base Station Electricity Costs (\$m) Split by Scenario, 2008-2014.....	14
Figure ES4: Base Station Electricity Usage (kWh) Per Mobile Subscriber Per Annum Split by Scenario, 2008-2014.....	15
Table ES4: Base Station Electricity Usage (kWh) Per Mobile Subscriber Per Annum Split by Scenario, 2008-2014	15
Strategic Recommendations.....	15
I. The Need for Change	
<hr/>	
I.1 Introduction	19
I.2 The Global Drive for Climate Change.....	19
I.2.1 United Nations Framework Convention on Climate Change (UNFCCC)	20
I.2.2 Regional and National Legislation.....	21
i. European Union	21
a. RoHS & WEEE	21
- RoHS Direct Impact on the Mobile Industry: The Treo 650	22
b. Carbon Trading: Obligations and Opportunities.....	22
I.3 Key Drivers for Environmentally Sustainable Business Practices	23
I.3.1 Regulatory: Existing CO2 Levels Must be Reduced to Protect the Environment..	23
I.3.2 Consumer-Driven: Environmental Considerations are Influencing Choice of Product	23
I.3.3 Economic: The Need for Energy Efficiency.....	23
I.3.4 Economic: The Rising Costs of Fossil Fuels.....	24
I.4 The Industry Response: Integrated Product Policy (IPP) Pilot Project....	24
Figure I.1: ICT Impacts and Opportunities.....	24

Table 1.1: IPP Pilot Project Stages.....25

1.5 The Growth of the Mobile Market and Its Environmental Impact 26

1.5.1 Mobile User Base 26

Figure 1.2: Mobile Subscriber Base (m) Split by 8 Key Regions, 2007-2014.....26

Table 1.2: Mobile Subscriber Base (m) Split by 8 Key Regions, 2007-201427

1.5.2 The Growing Demand for Base Stations..... 27

Figure 1.3: Average Number of Subscribers Per Active Base Station Split by 8 Key Regions, 2007-2014 27

Table 1.3: Average Number of Subscribers Per Active Base Station Split by 8 Key Regions, 2007-2014.....28

Figure 1.4: Total Number of Active Base Stations (m) Split by 8 Key Regions, 2007-2014.....29

Table 1.4: Total Number of Active Base Stations (m) Split by 8 Key Regions, 2007-2014.....29

1.5.3 CO2 Emissions Across the Mobile Industry 29

Figure 1.5: Mobile Use Phase, CO2 Emissions, 200830

i. Consumers.....30

ii. Radio Base Station.....30

iii. Network Control, Core & Data Servers30

1.5.4 Reducing the Footprint 31

Figure 1.6: Maintaining a Stable CO2 Footprint - Growth in Mobile Subscriber Base vs. CO2 Emissions Per User, 2008-201431

1.6 Three Scenarios: Incremental, Progressive, Transformational 32

Table 1.5: Top-line Scenario-Based Forecast Assumptions32

1.6.1 Methodology 32

Figure 1.7 Forecast Methodology33

2. Powering the Network

2.1 Key Forms of Renewable Energy 35

2.1.1 Solar Energy..... 35

2.1.2 Wind 35

Figure 2.1: Wind Turbine Designs.....36

2.1.3 Other Forms of Renewable Energy..... 36

i. Pico-Hydro Power36

ii. Biodiesel36

iii. Fuel Cells.....36

2.2 Renewable Energy in Developed Markets..... 37

Figure 2.2: Selected Operators and Vendors, Percentage Green Electricity Utilisation, 200837

Table 2.1: Selected Operators and Vendors, Green Electricity Utilisation (2008) and Future Targets38

2.3 Renewable Energy in Developing Markets..... 38

Table 2.2: Energy Efficiency Comparison: Vodafone India versus Other Vodafone Companies, 2008/9.....39

2.3.1 GSMA Green Power Initiative..... 39

2.3.2 Renewable Energy Deployments in Developing Markets..... 40

i. Case Study: Vodafone/Vodacom40

ii. Case Study: Nokia Siemens Networks/ETC Ethiopia.....40

Figure 2.3: NSN Solar Panel Array at Ethiopia Base Station.....40

iii. Case Study: Safaricom.....	41
Figure 2.4: Huawei Wind-solar-diesel Powered BTS, Kenya.....	41
2.4 Constraints on Renewable Energy	42
2.4.1 Wind Energy.....	42
i. Geographic Location.....	42
ii. Cost.....	42
iii. Turbine Design Must be Optimised to Reflect Localised Conditions	42
2.4.2 Solar Energy	43
i. Geographic Location.....	43
ii. Cost.....	43
Figure 2.5: RPI of Solar Modules, US and Europe.....	43
Figure 2.6: Photovoltaic Solar Energy Potential in European Countries.....	44
2.4.3 Other Renewable Resources.....	44
i. Biodiesel.....	44
2.4 Which Renewable Energy Resource?.....	44
2.4.1 Developing Markets	44
Figure 2.7: Motorola Assessment Model for Network Energy Resource	45
i. Capex and Opex.....	45
ii. Location	45
iii. Load Requirements.....	45
3. Base Station Forecasts	
3.1 Base Station Deployments.....	47
3.1.1 Incremental Scenario	47
Table 3.1: Incremental Scenario - Base Station Deployments Per Annum Split by 8 Key Regions, 2008-2014.....	47
Table 3.2: Incremental Scenario – Percentage of Deployed Base Stations Which Utilise Renewable Energy Split by 8 Key Regions, 2008-2014.....	48
Figure 3.1: Incremental Scenario - Annual Deployments of Base Stations Which Utilise Renewable Energy Split by 8 Key Regions, 2008-2014.....	48
Table 3.3: Incremental Scenario - Annual Deployments of Base Stations Which Utilise Renewable Energy Split by 8 Key Regions, 2008-2014.....	49
3.1.2 Progressive Scenario	49
Table 3.4: Progressive Scenario - Base Station Deployments Per Annum Split by 8 Key Regions, 2008-2014.....	49
Table 3.5: Progressive Scenario – Percentage of Annual Deployments of Base Stations Which Utilise Renewable Energy Split by 8 Key Regions, 2008-2014.....	50
Figure 3.2: Progressive Scenario - Annual Deployments of Base Stations Which Utilise Renewable Energy Split by 8 Key Regions, 2008-2014.....	50
Table 3.6: Progressive Scenario - Annual Deployments of Base Stations Which Utilise Renewable Energy Split by 8 Key Regions, 2008-2014.....	51
3.1.3 Transformational Scenario	51
Table 3.7: Transformational Scenario - Base Station Deployments Per Annum Split by 8 Key Regions, 2008-2014.....	51
Table 3.8: Transformational Scenario – Percentage of Annual Deployments of Base Stations Which Utilise Renewable Energy Split by 8 Key Regions, 2008-2014	52
Figure 3.3: Transformational Scenario- Annual Deployments of Base Stations Which Utilise Renewable Energy Split by 8 Key Regions, 2008-2014.....	52
Table 3.9: Transformational Scenario - Annual Deployments of Base Stations Which Utilise Renewable Energy Split by 8 Key Regions, 2008-2014.....	53

3.2 Green Electricity	53
3.2.1 Incremental Scenario	53
Table 3.10: Incremental Scenario – Percentage of Total Base Station Electricity Generated by Off-Grid Renewable Resources Split by 8 Key Regions, 2008-2014	53
Figure 3.4: Incremental Scenario - Annual Power Generation (GHz) from Off-Grid Renewable Resources Split by 8 Key Regions, 2008-2014	54
Table 3.11: Incremental Scenario - Annual Power Generation (GWh) from Off-Grid Renewable Resources Split by 8 Key Regions, 2008-2014	54
3.2.2 Progressive Scenario	55
Table 3.12: Progressive Scenario – Percentage of Total Base Station Electricity Generated by Off-Grid Renewable Resources Split by 8 Key Regions, 2008-2014	55
Figure 3.5: Progressive Scenario - Annual Power Generation (GHz) from Off-Grid Renewable Resources Split By 8 Key Regions, 2008-2014	55
Table 3.13: Progressive Scenario - Annual Power Generation (GWh) from Off-Grid Renewable Resources Split by 8 Key Regions, 2008-2014	56
3.2.3 Transformational Scenario	56
Table 3.14: Transformational Scenario – Percentage of Total Base Station Electricity Generated by Off-Grid Renewable Resources Split by 8 Key Regions, 2008-2014	56
Figure 3.6: Transformational Scenario - Annual Power Generation (GWh) from Off-Grid Renewable Resources Split by 8 Key Regions, 2008-2014	57
Table 3.15: Transformational Scenario - Annual Power Generation (GWh) from Off-Grid Renewable Resources Split by 8 Key Regions, 2008-2014	57
3.3 CO2 Emissions	57
3.3.1 Emissions from Grid Electricity	58
i. Incremental Scenario	58
Figure 3.7: Incremental Scenario – CO2 Emissions (kg/kWh) of Base Station Grid Electricity Split by 8 Key Regions, 2008-2014	58
Table 3.16: Incremental Scenario – CO2 Emissions (kg/kWh) of Base Station Grid Electricity Split by 8 Key Regions, 2008-2014	59
Figure 3.8: Incremental Scenario - On-Grid Base Stations, CO2 Emissions (Mt) Split by 8 Key Regions, 2008-2014	59
Table 3.17: Incremental Scenario - On-Grid Base Stations, CO2 Emissions (Mt) Split by 8 Key Regions, 2008-2014	60
ii. Progressive Scenario	60
Figure 3.9: Progressive Scenario – CO2 Emissions (kg/kWh) of Base Station Grid Electricity Split by 8 Key Regions, 2008-2014	60
Table 3.18: Progressive Scenario – CO2 Emissions (kg/kWh) of Base Station Grid Electricity Split by 8 Key Regions, 2008-2014	61
Figure 3.10: Progressive Scenario - On-grid Base Stations, CO2 Emissions (Mt) Split by 8 Key Regions, 2008-2014	61
Table 3.19: Progressive Scenario - On-grid Base Stations, CO2 Emissions (Mt) Split by 8 Key Regions, 2008-2014	62
iii. Transformational Scenario	62
Figure 3.11: Transformational Scenario – CO2 Emissions (kg/kWh) of Base Station Grid Electricity Split by 8 Key Regions, 2008-2014	62
Table 3.20: Transformational Scenario – CO2 Emissions (kg/kWh) of Base Station Grid Electricity Split by 8 Key Regions, 2008-2014	63
Figure 3.12: Transformational Scenario - On-Grid Base Stations, CO2 Emissions (Mt) Split by 8 Key Regions, 2008-2014	63
Table 3.21: Transformational Scenario - On-Grid Base Stations, CO2 Emissions (Mt) Split by 8 Key Regions, 2008-2014	64
3.3.2 Emissions from Off-Grid Electricity	64
i. Incremental Scenario	64
Table 3.22: Incremental Scenario - Percentage of Base Station Electricity Derived from Diesel-Powered Off-Grid Generators Split by 8 Key Regions, 2008-2014	64

Figure 3.13: Incremental Scenario - Base Station Electricity (GWh) Derived from Diesel-Powered Off-Grid Generators Split by 8 Key Regions, 2008-2014	65
Table 3.23: Incremental Scenario - Base Station Electricity (GWh) Derived from Diesel-Powered Off-Grid Generators Split by 8 Key Regions, 2008-2014	65
Figure 3.14: Incremental Scenario – Off-Grid Base Stations, CO2 Emissions (Mt) Split by 8 Key Regions, 2008-2014.....	66
Table 3.24: Incremental Scenario – Off-Grid Base Stations, CO2 Emissions (Mt) Split by 8 Key Regions, 2008-2014.....	66
ii. Progressive Scenario	66
Table 3.25: Progressive Scenario - Percentage of Base Station Electricity Derived from Diesel-Powered Off-Grid Generators Split by 8 Key Regions, 2008-2014	67
Figure 3.15: Progressive Scenario - Base Station Electricity (GWh) Derived from Diesel-Powered Off-Grid Generators Split by 8 Key Regions, 2008-2014	67
Table 3.26: Progressive Scenario - Base Station Electricity (GWh) Derived from Diesel-Powered Off-Grid Generators Split by 8 Key Regions, 2008-2014	68
Figure 3.16: Progressive Scenario – Off-Grid Base Stations, CO2 Emissions (Mt) Split by 8 Key Regions, 2008-2014.....	68
Table 3.27: Progressive Scenario – Off-Grid Base Stations, CO2 Emissions (Mt) Split by 8 Key Regions, 2008-2014.....	69
iii. Transformational Scenario.....	69

3.3.4 CO2 Emissions per Mobile Subscriber	75
Figure 3.24: Base Station CO2 Emissions (kg) Per Mobile Subscriber Split by Scenario, 2008-2014	76
Table 3.35: Base Station CO2 Emissions (kg) Per Mobile Subscriber Split by Scenario, 2008-2014.....	76

4. Enhancing the Network

4.1 Introduction

Figure 4.1: Traditional Base Station Design77

4.2 How Can Power Wastage be Reduced? 78

4.2.1 Network Planning 78

4.2.2 Increasing Base Station Coverage/Reduce Inefficiency in PA..... 78

Figure 4.2: Heat Dissipation in Power Amplifier, Modulated Voltage vs. Fixed Voltage.....79

4.2.3 Reducing Air Conditioning..... 79

4.2.4 Using Feederless Sites and Remote Radio Heads 80

Figure 4.3: Remote Station Configurations.....80

i. Case Study: Flexi Base Stations81

Figure 4.3: Nokia Flexi Base Stations81

4.2.5 Improving Efficiency Within the Cable..... 81

4.2.6 Energy Saving/Standby 82

4.2.7 Remote Monitoring..... 82

4.2.8 Site Energy Efficiency 83

4.2.9 Network Sharing 83

5. Base Station Power Consumption & Electricity Costs

5.1 Implied Cost of Base Station Electricity 85

Figure 5.1: Global Average Implied Cost of Base Station Electricity Split by Source, 2008-2014 ..86

Table 5.1: Global Average Implied Cost of Base Station Electricity Split by Source, 2008-201486

5.2 Power Output..... 86

5.2.1 Incremental Scenario 86

Table 5.2: Incremental Scenario. Average Power Output Per Base Station (W) Split by 8 Key Regions, 2008-201487

Figure 5.2: Incremental Scenario - Total Mobile Base Station Power Consumption (GWh) Split by 8 Key Regions, 2008-2014.....88

Table 5.3: Incremental Scenario - Total Mobile Base Station Power Consumption (GWh) Split by 8 Key Regions, 2008-2014.....88

5.3.2 Progressive Scenario 88

Table 5.4: Progressive Scenario - Average Power Output Per Base Station (W) Split by 8 Key Regions, 2008-201489

Figure 5.3: Progressive Scenario - Total Mobile Base Station Power Consumption (GWh) Split by 8 Key Regions, 2008-2014.....89

Table 5.5: Progressive Scenario - Total Mobile Base Station Power Consumption (GWh) Split by 8 Key Regions, 2008-2014.....90

5.3.3 Transformational Scenario 90

Table 5.6: Transformational Scenario - Average Power Output Per Base Station (W) Split By 8 Key Regions, 2008-2014.....91

Figure 5.4: Transformational Scenario - Total Mobile Base Station Power Consumption (GWh) Split by 8 Key Regions, 2008-2014.....91

Table 5.7: Transformational Scenario - Total Mobile Base Station Power Consumption (GWh) Split by 8 Key Regions, 2008-2014.....92

5.3 Cost of Electricity 92

5.3.1 Incremental Scenario 92

Figure 5.5: Incremental Scenario - Implied Cost per kWh (\$) of Base Station Electricity Split by 8 Key Regions, 2008-201492

Table 5.8: Incremental Scenario - Implied Cost per kWh (\$) of Base Station Electricity Split by 8 Key Regions, 2008-2014.....	93
Figure 5.6: Incremental Scenario - Total Operator Base Station Electricity Costs (\$m) Split by 8 Key Regions, 2008-2014.....	93
Table 5.9: Incremental Scenario - Total Operator Base Station Electricity Costs (\$m) Split by 8 Key Regions, 2008-2014.....	94
Table 5.10: Incremental Scenario - Total Electricity Costs in Relation to Operator-Billed Revenues (%) by 8 Key Regions 2008-2014.....	94
5.3.2 Progressive Scenario	94
Figure 5.7: Progressive Scenario - Implied Cost per kWh (\$) of Base Station Electricity Split by 8 Key Regions, 2008-2014.....	95
Table 5.11: Progressive Scenario - Implied Cost per kWh (\$) of Base Station Electricity Split by 8 Key Regions, 2008-2014.....	95
Figure 5.8: Progressive Scenario - Total Operator Base Station Electricity Costs (\$m) Split by 8 Key Regions, 2008-2014.....	96
Table 5.12: Progressive Scenario - Total Operator Base Station Electricity Costs (\$m) Split by 8 Key Regions, 2008-2014.....	96
Table 5.13: Progressive Scenario - Total Electricity Costs in Relation to Operator-Billed Revenues (%) Split by 8 Key Regions, 2008-2014.....	97
5.3.3 Transformational Scenario	97
Figure 5.9: Transformational Scenario - Implied Cost per kWh (\$) of Base Station Electricity Split by 8 Key Regions, 2008-2014.....	97
Table 5.14: Transformational Scenario - Implied Cost per kWh (\$) of Base Station Electricity Split by 8 Key Regions, 2008-2014.....	98
Figure 5.10: Transformational Scenario - Total Operator Base Station Electricity Costs (\$m) Split by 8 Key Regions, 2008-2014.....	98
Table 5.15: Transformational Scenario - Total Operator Base Station Electricity Costs (\$m) Split by 8 Key Regions, 2008-2014.....	99
Table 5.16: Transformational Scenario - Total Electricity Costs in Relation to Operator-Billed Revenues (%) Split by 8 Key Regions, 2008-2014.....	99
5.3.4 Scenario Comparison	99
Figure 5.11: Base Station Electricity Costs (\$m) Split by Scenario, 2008-2014.....	100

5.3.5 Base Station Electricity Usage by Mobile Subscriber	100
Figure 5.12: Base Station Electricity Usage (kWh) Per Mobile Subscriber Per Annum Split by Scenario, 2008-2014.....	101
Table 5.18: Base Station Electricity Usage (kWh) Per Mobile Subscriber Per Annum Split by Scenario, 2008-2014.....	101

6. Environmentally Sustainable Business Practice

6.1 Introduction	103
6.2 Environmental Management	104
6.2.1 Waste Management.....	104
i. Network-related Waste.....	104
ii. Tertiary Waste.....	104
6.3 Teleconferencing and Teleworking.....	105
6.3.1 Case Study: TelePresence.....	105
Figure 6.1: Tandberg TelePresence T3 Videoconferencing Suite.....	106
6.4 Greener Transport.....	106
6.4.1 Greener Cars.....	106

i. LPG.....	106
6.4.2 Offset Fleet Emissions	106
6.4.3 Car Pooling	107
6.4.4 Alternative Means of Travel	107
6.5 Efficiencies in Online Data Storage	107
6.5.1 Case Studies: AT&T.....	108
6.6 Smart Networks.....	108
6.7 Paperless Billing	108

Figure 6.2: Orange (France Telecom), Consumer Uptake of Paperless Billing, Fixed and Mobile Customers 2008.....	109
Table 6.1: Hypothetical Reduction in Paper Wastage & CO2 Emissions Based on 50% Adoption of Paperless Billing, Selected Markets	109
